EDUCATION

KDK College of Engineering

B.Tech in Electronics and Telecommunication Engineering

Nagpur, Maharashtra

2021 – 2025

EXPERIENCE

Cloudnautic [🔗](#)

AWS DevOps Intern

June 2025 – December 2025

Pune, Maharashtra (On-site)

- Supported deployment and management of **AWS infrastructure** including **EC2, S3, IAM, VPC, RDS, and ALB** following cloud best practices.
- Built and maintained **CI/CD pipelines** using **Jenkins** and **GitLab CI** to automate application build and deployment workflows.
- Containerized applications using **Docker** and deployed workloads on **Kubernetes**, improving scalability and deployment consistency.
- Automated infrastructure provisioning using **Terraform** and monitored systems using **CloudWatch, Prometheus, and Grafana**.

TECHNICAL SKILLS

Core DevOps: Docker, Kubernetes, Amazon EKS, Jenkins, Terraform

Cloud Platform: AWS (EC2, EKS, ECR, S3, RDS, IAM, VPC, ALB, CloudWatch)

CI/CD: Jenkins, GitLab CI, SonarQube

Infrastructure as Code: Terraform

Monitoring & Observability: Prometheus, Grafana, CloudWatch

Scripting: Bash, Python (basic automation)

Version Control: Git, GitHub

Operating Systems: Linux (Ubuntu, Amazon Linux)

Configuration Management (Familiar): Ansible, Puppet, Chef

PROJECTS

ShopDeploy Cloud Native DevOps Platform [🔗](#) | AWS, Jenkins, Docker, Kubernetes, Terraform

- Implemented an end-to-end **CI/CD pipeline** using Jenkins to automate build, test, image creation, and deployment to **AWS EKS**.
- Provisioned scalable cloud infrastructure using **Terraform (IaC)** including VPC, EKS, IAM roles, and ECR.
- Containerized frontend and backend services with **Docker** and deployed using **Helm charts** on Kubernetes.
- Enabled autoscaling and observability using **HPA, Prometheus, and Grafana** dashboards.

TodoApp CI/CD DevOps Pipeline [🔗](#) | Jenkins, Docker, Kubernetes, SonarQube, Prometheus, Grafana

- Implemented a **CI/CD pipeline** using Jenkins and GitHub webhooks to automate build, test, and deployment workflows.
- Containerized the application using **Docker** and managed versioned images in **Docker Hub**.
- Deployed the application on **Kubernetes** using Deployments, Services, Ingress, ConfigMaps, and **HPA**.
- Configured **Prometheus** and **Grafana** dashboards to monitor application and cluster performance.

Node.js App Deployment on AWS EKS [🔗](#) | Node.js, Docker, Kubernetes, AWS EKS, ECR

- Containerized a **Node.js application** using Docker and deployed it on **AWS EKS** with images stored in **Amazon ECR**.
- Configured **IAM roles**, Kubernetes **RBAC**, and Service types to enable secure and controlled cluster access.
- Implemented **HPA** and monitored application health using **CloudWatch** to support scalable deployments.
- Performed rolling updates and configured **liveness and readiness probes** using **kubectrl**.

CERTIFICATIONS

- AWS Certified Solutions Architect Associate** — Amazon Web Services
- DevOps Training Program — Ethan's Tech
